

IPFS Pinning Service Config

Get IPFS Pinning Service Config Function

```
Ipfs.GetIpfsPinningServiceConfig(IpfsPinningService ipfsPinningService)
```

This is a helper function that holds default information for commonly used **IPFS** pinning services.

NOTE

Additional pinning services will be added in future updates if needed.

This function returns an **IpfsPinningServiceConfig** object that contains:

- **Url**: The pinning service API endpoint URL.
- **Name**: The name of the pinning service API endpoint provider.
