

IPFS Gateway Config

Get IPFS Gateway Config Function

```
Ipfs.GetIpfsHttpGatewayConfig(IpfsHttpGateway ipfsHttpGateway)
```

This is a helper function that holds default information for commonly used `IPFS` gateways.

NOTE

Additional gateways will be added in future updates if needed.

This function returns an `IpfsHttpGatewayConfig` object that contains:

- `Url`: The gateway URL to send the Http requests to.
